```html
1  <!DOCTYPE html>
2  <html>
3  <head>
4      <title></title>
5  </head>
6  <body>
7      <table border = "1"> <!-- Normally we would not do this, instead we would use CSS -->
8          <thead>
9              <tr>
10                 <th>Name</th><!-- This is table header -->
11                 <th>Age</th>
12                 <th>Ethnicity</th>
13             </tr>
14         </thead>
15         <tbody>
16             <tr>
17                 <td>Opal</td>
18                 <td>22</td>
19                 <td>Thailand</td>
20             </tr>
21             <tr>
22                 <td>Christopher</td>
23                 <td>21</td>
24                 <td>Korean</td>
25             </tr>
26         </tbody>
27     </table>
28 </body>
29 </html>
30 <!--
31 <tr></tr> Will represent our column
32 <td></td> Will represent our row
33 <th></th> Will represent our header(heading)
34  -->
35
36 <!--
37 <thead></thead> Will be our heading
38 <tbody></tbody> Will be our body
39 These are more used for HTML5
40  -->
41
```
